

## Choose Color and Order

Choosing a color isn't critical, but provides a way to determine scoring during game play. The "shooting" order can be done via coin flip or slide a single puck closest to a given target or closest puck to the end of the table or whatever method you'd like. Once the order is selected, each player takes a turn sliding their colored puck. Unlike the traditional game, play is only from one side of the table (the side with the logo).

## Sliding Pucks

Pucks are slid from the end of the table and cannot be slid from the side of the table. Throwing pucks is considered highly inappropriate.

## Poker Chips

Prior to the start of the game, agree on the denominations of each color of the chips.

## The Play (5-Card Poker)

- ♠ To begin, each player antes 1 chip from their pile.
- ♠ Choose which player will deal first. The dealer will alternate between hands. The dealer will shoot their pucks second.
- ♠ Shuffle the physical deck of cards and deal 2 cards face down to each player. This is their blind.
- ♠ Each player can bet 1-2 chips based on their blind.
- ♠ Each player alternately shoots a puck trying to better their hand.
  - ♣ Touching more than one card – choose best card.
  - ♣ After each player shoots 1 puck, either player can bet 1-2 chips.
  - ♣ A player may fold at any time.
- ♠ Puck hanging off Wild Card edge – choose any card.
- ♠ After all 6 pucks have been thrown, the hand is over and each player determines their own best hand.
  - ♣ Final bets are made.
  - ♣ Players reveal their hole cards and state what their best hand is.
  - ♣ Winner of hand collects all chips bet.
- ♠ Play continues until 1 player has all the chips in their stack or 5 hands have been played.
- ♠ Winner has the most chips. If chip count is tied, winner is the one with most hands won.

## The Play (7-Card Poker)

- ♠ Same as 5-card poker, but each player is dealt 3 cards down, shooting 4 pucks to complete their best 5-card hand.
